

Contact Adhesive Thinner

Trade Essentials Contact Adhesive Thinner is a solvent blend designed for the thinning of multi-purpose neoprene based contact adhesives.

APPLICATION

Thinning of sprayable Neoprene contact adhesive is not recommended; however, if the adhesive has thickened beyond the point of easy application, only thin to original consistency with Trade Essentials Contact Adhesive Thinner:

DO NOT thin with any other commercial thinner:

NOT suitable for use with adhesives for bonding polystyrene foam, since attack of the foam will occur.

Avoid contact with lacquered or plastic surfaces.

Please read the Material Safety Data Sheet for this product before it is used.

TYPICAL PROPERTIES

Colour:	Clear Liquid
Specific Gravity:	0.78kg/ltr approx.
Viscosity:	Water thin
Solids:	0%
