

Trade Essentials® PVA Adhesives

- Trade Essentials® PVA Adhesives are designed for use on a wide range of timber and wood based panel products and can be used in various applications.
- Trade Essentials General Purpose PVA is a fast setting high bond strength grade PVA, suitable for bonding most soft and hard woods, as well as particleboard and MDF. It is an excellent adhesive for dowel, mortice and tenon joints. It is suitable for general purpose bonding for joinery and assembly work, where good bond strength and short clamp times are desirable.
- Trade Essentials Cross Linking PVA provides excellent bond strength for applications that require high heat and humidity resistance.
- Both Trade Essentials General Purpose PVA and Trade Essentials Cross Linking PVA have been independently certified as environmentally preferable by Good Environmental Choice Australia.

Reduced Emissions for Better Indoor Air Quality

Trade Essentials PVA Adhesives are manufactured with no toxic compounds while still maintaining bonding strength for the intended purpose. It contains no carcinogenic materials or other highly toxic materials, with no vinyl acetate or glycol compounds being detected. Independent testing has detected zero levels of Volatile Organic Compounds (VOC). This contributes to improved indoor environment quality and also in reducing overall outdoor atmospheric pollution.

Green Star Office Interiors Compatibility (v1.1)

IEQ II – Volatile Organic Compounds

Trade Essentials PVA Adhesives meet the Green Star Office Interiors reduced maximum VOC content as below.

Maximum TVOC content (g/litre of product) = 0

Maximum TVOC emissions (g ug/m²/hr at 14 days) = 0

The use of Trade Essentials PVA Adhesive will contribute towards achievement of 2 credit points.

Trade Essentials® PVA and Trade Essentials® Cross Linking PVA adhesives have been certified as environmentally preferable products by Good Environmental Choice Australia.
