Formica Vinyl Doors - Opening the door to a fully integrated look

The latest expansion to the Formica Vinyl Door range offers designers a complete solution to harmonise colours and finishes with the wider Formica range to create a fully integrated, modern look for any interior.

Specially chosen to match the Formica LPM board colours and finishes, the range is made up of six contemporary solid colours and four woodgrains, with eight diverse profile styles each offering their own unique look.

The expanded range of Formica Vinyl Doors – available in gloss, velvet or pearl finishes – can be used for cabinet doors alongside the Formica Colour Palette as a cost effective solution in both commercial and domestic projects.

The dark hues of *Fini Chocolate*, *Vicenza Walnut* and *Charred Oak* will add dramatic and bold touches to any interior. The illusion of open space and enhancement of natural light can be achieved with *Snowdrift* and *Warm White*.

Durable, water resistant and easy to clean, the 18mm thick doors are available in a sheet size of up to 2400mm x 1200mm.

The Formica Vinyl Door range is backed with a reassuring seven year limited warranty, ensuring a long-lasting modern look.

To find out more about Formica, view the Vinyl Door range or find a stockist in your region, visit www.formica.com.au.
