JULY 2010

## Laminex® DiamondGloss® Surfaces: New solid decors add depth to design

With the latest unveiling of six new solid decors in its sought-after range of Laminex® DiamondGloss® Surfaces, Laminex continues to explore and push the frontiers of superior, flexible interior design.

Available from August 2010, the six new solid decors expand the range's solid decor offering to nine options, with each hand-picked from the Laminex Colour Palette to bring even more depth and dimension to the desirable Laminex DiamondGloss Surfaces range.

Spanning across the spectrum of light and dark, the new solid decors are designed to create a stunning visual impact in both commercial and residential settings. Lighter lustrous tones of *White*, *Parchment*, *Pumice* and *Peruvian Clay* are popular choices for creating a striking high-gloss kitchen counter top, while darker shades of *Black* and *Charcoal* will accentuate sophisticated design features and create an immediate impact in commercial spaces.

The nine solid decors join 11 patterns and woodgrain finishes hand-selected for the Laminex DiamondGloss Surfaces commercial range, with an array of 39 patterned finishes available across the complete Laminex DiamondGloss Surfaces range. To create a seamless finish, a range of edging options is also available.

Choosing the right material is paramount when creating a functional space for any project. Laminex DiamondGloss Surfaces feature exceptional scuff resistance and are easy to maintain, giving them a superior, long-lasting finish.

Complete with a seven-year limited warranty, Laminex DiamondGloss Surfaces are perfect for vertical and horizontal applications. For further information or brochures, visit [laminex.com.au](http://laminex.com.au) or contact 132 136.
