### **Laminex® XR Grade: The most robust compact laminate**

Robust enough to endure burns, scratches, chemical abuse and general wear and tear, Laminex has launched XR Grade – an extra resilient compact laminate surface designed to withstand the demanding environment of restaurants, cafes and commercial spaces.

A highly durable compact laminate, Laminex XR Grade has enhanced resilience to chemicals, moisture, scratches, stains and damage caused by vandals, as verified by vigorous Australian and New Zealand industry standard testing.

This makes Laminex XR Grade the surface of choice to endure the most rigorous commercial and hospitality environments. Available in 13mm thickness, it is ideal for vertical applications including laboratories and other high-abuse surfaces.

Laminex Marketing Manager, Jared Dinneen, said Laminex uses its expertise and experience in delivering surface solutions for every type of interior project to continually meet and exceed the surface needs of today's commercial buildings.

"We are always exploring and developing the latest technology and innovations to provide surface solutions for a variety of unique functionality and design challenges," he said.

A truly durable surface, Laminex XR Grade comes complete with a 10 year limited warranty.

For further information on Laminex XR Grade Compact Laminate or to download a brochure, visit [www.laminex.com.au](http://www.laminex.com.au).
