

## Laminex® Aquapanel®

One clear choice for wet area wall panelling

Understanding the market's need for a simple, comprehensive solution that addresses the unique design, practicality and budget requirements of each project, Laminex® has streamlined its Wet Area Panelling offerings, Vizage™ and Aquapanel®, into a single range: Laminex Aquapanel.

This exciting development in the Laminex Wet Area Wall Panelling offering is heralded with the addition of **six new decors** to the range carefully chosen from the Laminex Colour Palette to meet emerging design trends.

This brings the total Aquapanel collection to **30 decors**, with colours ranging from White Gloss through to Black, across a variety of finishes - gloss, glaze, ripple and tile. With colours hand-picked from the Laminex Colour Palette, Laminex makes it easy for wall panelling to seamlessly integrate with the room's surfaces to craft a complete interior look.

Ideal for both vertical and horizontal applications, Laminex Aquapanel surfaces are **easy to install**, with a coordinated fixing system enabling perfect integrated joins without the need for grouting. The non-porous, **durable** surfaces mean the polished look will endure the challenging environment of any commercial and residential interior space for years to come.

Complete with a seven-year limited warranty, Laminex Aquapanel reinforces Laminex's reputation for providing inspirational and functional design solutions that continue to give new direction for the interior design industry.

**New to range: Moleskin, Zincworks, New Graphite, Ash White, Parchment and Pearl Grey**
